

OBJECTIVE

Second-year B.Tech AI & DS student at K.J. Somaiya School of Engineering (CGPA: **8.9**) seeking an AI/Data Science internship. Experienced in machine learning, data analysis, algorithm design, and building data-driven applications. Passionate about applying AI techniques to solve real-world problems.

EDUCATION

Year	Degree	Institute	CGPA
2024-2028	B.Tech — Artificial Intelligence & Data Science	K.J. Somaiya School of Engineering	8.9

EXPERIENCE

- **Research Intern — K.J. Somaiya College of Engineering**

Under Prof. Deepti Patole

2026
Mumbai

– Built a **Doomscrolling Awareness App** (Flutter) with real-time **usage analytics**, screen time monitoring, and data-driven habit-nudge notifications.

– Conducted user research, translated behavioural data findings into product features, managed full dev lifecycle.

PROJECTS

- **AI Maze Solver**

Python, Pygame, BFS, A Algorithm*

GitHub

– Interactive app visualizing **BFS and A* pathfinding** on user-drawn mazes in real time — demonstrates graph traversal and heuristic search.
- **Digital Wellness Analytics Dashboard**

Flutter, Dart — Research Internship KJSCE

GitHub

– Real-time **usage tracking and analytics dashboard** surfacing behavioural patterns; metrics fed into personalized alert and recommendation systems.
- **Student Attendance System**

Java Swing, PostgreSQL

GitHub

– Full-stack desktop system with **PostgreSQL** backend for attendance records, CRUD operations, and automated report generation.
- **DNS Spoofing Demo**

Python, Networking, Cybersecurity

GitHub

– Simulated a **DNS spoofing attack** in a controlled environment to demonstrate domain hijacking and network security vulnerabilities.
- **Momo Express — Restaurant Website**

HTML5, CSS3, JavaScript

Live Demo

– Responsive restaurant website with dynamic menu, smooth animations, and mobile-first layout — deployed on **GitHub Pages**.

TECHNICAL SKILLS

- **Languages:** Python, Java, C, Dart

• **AI/ML & Data Science:** Machine Learning (scikit-learn), Data Analysis, Data Visualization, Tableau, BFS/A* Algorithms, Kaggle

• **Web & Mobile:** HTML5, CSS3, JavaScript, Flutter

• **Databases:** PostgreSQL, MySQL

• **Tools:** Git, GitHub, Jupyter Notebook, VS Code, Tableau

RELEVANT COURSEWORK

- **Core:** Data Structures & Algorithms, Machine Learning, Python Programming, Database Management Systems, Computer Networks, Cybersecurity Fundamentals

CERTIFICATIONS & ACHIEVEMENTS

- Machine Learning with Python** — Kaggle (Verified Certificate)

•**Flutter App Development** — Simplilearn (Completion Certificate)

•**CTF 3.0 — Round 1 Qualified** — Capture The Flag Cybersecurity Competition (Top Qualifier)
